

MINER'S MOSS

**Surveyors
Exchange**

Unlike other matting, **Klondike Miner's** and **Yukon Dredger's Moss** was developed by Surveyors Exchange for industrial gold mining specifically to catch fine gold and protect it from abrasion from the gravel that pounds over it each second during the mining and recovery process.

The pounding and grinding of sand and gravel on the exposed gold can have an abrasive affect on the small gold particles to make them even smaller and easier to lose. The added mat thickness, weave and density, can also help the gold avoid being picked up by larger clay particles that can pack them out of the box.

KLONDIKE MINERS MOSS

The heaviest available on the market, the best fine gold trap.

Part # **GKMMB** **BACKED**

Apx. 3/4" (19 mm) thick
Similar to 3M 8150

- Size of roll: 4 ft x 20 ft
Weight 75 Lbs.
Price \$680 per roll

Part # **GKMM** **UNBACKED**

Apx. 3/4" (19 mm) thick
Similar but thicker than 3M 8100

- Size of roll: 4 ft x 20 ft
Weight 60 Lbs.
Price \$540 per roll
- Size of roll: 2 ft x 20 ft
Weight 30 Lbs.
Price \$270 per roll

YUKON DREDGERS MOSS

Part # **GYDM** **UNBACKED**

Apx. 1/2" (13 mm) thick
Similar to 3M 1500

- Size of roll: 4 ft x 20 ft
Weight 40 Lbs.
Price \$180 per roll
- Size of roll: 3 ft x 20 ft
Weight 30 Lbs.
Price \$140 per roll
- Size of roll: 2 ft x 20 ft
Weight 20 Lbs.
Price \$90 per roll
- Size of roll: 1 ft x 20 ft
Weight 10 Lbs.
Price \$40 per roll

The "Klondike Miners Moss" is made for larger sluice boxes in commercial mining operations. It gives large volumes of fine gold a secure place to hide. It is dense enough that riffles will not sink into it.

Shipped: ROLL

The "Yukon Dredgers Moss" is an acceptable substitute for the 3M 1500 Nomad matting which has been the standard miners moss used for decades. It is a little stiffer and won't allow the riffles to sink in.
